Book Information

There is something about Country Music that captures the heart and soul of America. There is also something else that seems to go hand in hand with Country Music and that is a love for our Country and for the men and women who serve in the military. This book only covers those artists who are living today but certainly recognizes those artists who have been called home to their Creator and will be honored in the TAPS section of this book. If for some reason I overlooked an artist I do apologize and I certainly appreciate their service and their contribution to Country music.

Over the years there has it seems a slew of patriotic or military typed songs performed by Country Artist. It may surprise you to find out though of all the Country Artist the ones WHO actually served and wore this nation's uniform really are. I know I was when I first was inspired to write this book. It truly was an inspirational and rewarding journey though as I did my research for this book and found out who they were. I hope you the reader feels the same way after reading HEROES OF THE STAGE. Some of them you will already have known about and some may come as a complete surprise to you. Some are more famous and well known than others, but all of them served this Nation for all of us and deserve our sincere thanks as well as our respect. As you come acquainted with these Artists who served you might just become a new fan or a fan all over again.
